reasons why you could end up losing important data stored on the computer or a removable device. Fortunately, there are applications such as iCare Data Recovery Free Product Key that can recover lost data due to virus infections, accidental partition formatting or human mistakes. Recover various types of files iCare Data Recovery Free can rescue documents (DOC, DOCX, XLS, XLSX, PPT, PPTX, HMTL, HTM, PDF), multimedia files (common audio and video formats, such as WAV, MP3, MID, OGG, AVI, 3GP, MP4, SWF, MOV

and so on), e-mail files generated by Outlook (PST) and Outlook Express (DBX), as well as many other types of files. The two available recovery modes can be used to retrieve items that were deleted accidentally, as well as deal with more serious data loss scenarios. Works with internal and external storage devices The application can work with local hard drives, memory cards, USB flash drives and other external storage devices and supports NTFS and FAT (FAT32, FAT16, FAT12, EXFAT) file systems. The intuitive interface acts like a wizard, guiding you

through the three necessary steps so as to retrieve your files. Thus, recovering the data becomes just a matter of a few clicks. First, you must choose the type of file to search for, while the second step requires you to select the target partition. Then, you must wait for the application to complete the scanning process. Depending on the size of the target storage medium and the file type you selected, the analysis can take less or more time. Recovered files are organized in tree-view, for easier navigation. An easy to use file recovery tool iCare Data

Recovery Free can restore files you lost due to various causes from all kinds of storage devices. The simple approach it adopts makes it suitable for any type of user and the wizard-like GUI speeds up the process even more. PRO LIMITATIONS: -
