The [Multifactorial study on the risk of stone formation in the different segments of the urinary tract]. The authors have studied, by multifactorial analysis (after elimination of variables included in the study), the risk of forming stones in the different segments of the urinary tract (bladder, lower ureter, upper ureter, renal pelvis, and upper and lower calyces of the kidney). There is no significant risk of stone formation in the upper ureter, renal pelvis, and upper calyx, and a significantly greater one in the lower ureter. The authors emphasize the inverse correlation, on the basis of statistically proven differences, between the risk of stone formation in the upper ureter and the stone area in the lower ureter, and therefore conclude that the diameter of the lower ureter should be considered a significant risk factor.
Q: What is the right synonym for "roundabout"? In German the word 'Umweg' can mean both roundabout and detour. I know that there is a difference in pronunciation. What is the correct way to translate 'roundabout'? My English dictionary says that 'roundabout' and 'detour' are synonyms. Does it make sense to use them as synonyms? A: There is no "correct" way to translate a word. However, there are some words that are used commonly in a specific context and have consistent meanings. When referring to a
